

Fachartikel – Christian Guist *et al.*

Stand: 05.02.2026

- Langer, P.; Mäder, M.; Guist, C.; Krause, M.; Marburg, S. (2025): More Than Six Elements Per Wavelength: The Practical Use of Structural Finite Element Models and Their Accuracy in Comparison with Experimental Results. In: *Advances in Underwater Acoustics, Structural Acoustics, and Computational Methods*, Vol. 3 (World Scientific). DOI: 10.1142/9789819803460_0011.
- Zacharias, C.; Könke, C.; Guist, C. (2022): A New Efficient Approach to Simulate Material Damping in Metals by Modeling Thermoelastic Coupling. *Materials* 15(5), 1706. DOI: 10.3390/ma15051706.
- Zacharias, C.; Könke, C.; Guist, C. (2021): An alternative approach of modeling thermoelastic damping in shell structures. Manuskript eingereicht bei *Journal of Sound and Vibration* (ID: SV-D-21-00135).
